

# Anker SOLIX X1 Home Energy Storage System [Warranty Policy] - AU - A5220 PACK

Anker SOLIX provides a straightforward warranty that is processed in the most hassle-free way possible. Please refer to the chart below for the warranty timelines of various parts and products, as warranty periods differ according to models.

## Limited Warranty:

All quality-related defects on items sold directly by Anker or Anker's authorized resellers are covered by an extensive warranty. The warranty time starts on the date when the products are installed and activated or delivered 180 days(whichever is earlier).

This limited warranty provided by the manufacturer in no way affects a potential statutory warranty provided by law. All the listed warranty timelines are only valid for purchases from our official website or partners listed on our official website directly (if applicable). For purchases from local stores, resellers, or distributors that are not listed on our official website, please contact [support@anker.com](mailto:support@anker.com) with your order receipt for further confirmation.

Our goods come with guarantees that cannot be excluded under the Australian Consumer Law. You are entitled to a replacement or refund for a major failure and compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure.

## Notices

1. Anker's limited warranty is restricted to the country of purchase. The limited warranty is void on items taken outside the country they were originally bought in or shipped directly from an authorized purchase. Warranties on products are void after having been fully refunded. Warranties on all replacements follow the same warranty timeframe as the original defective item.
2. The warranty policy for the battery pack ends when either the end of the warranty period has been reached or the throughput has been completed, contingent upon the remaining capacity EOL meeting the specified requirements, with the earliest condition taking precedence. The warranty for the power module DCDC is solely time-bound and is independent of the battery's performance. It is important to note that the warranties for the battery pack and power module are provided separately and are not interconnected.
3. The operation and service life of the battery are related to the working temperature, humidity, and altitude. The recommended working temperature for the battery is 59°F to 86°F/ 15 to 30°C (For more details about product working environment requirements, please refer to the specification sheet).
4. Batteries must be installed within 30 days of receipt to qualify for the warranty. When the SOC of the battery decreases to 0%, charge the battery within seven days. Any permanent battery damage due to the customer's failure to charge the battery properly is not covered under warranty.

## How To Process:

If, during the applicable warranty period, the buyer discovers any defect in materials and seeks to activate the limited warranty, then the buyer shall, promptly after such discovery, report the defect to Anker SOLIX by sending an email to [support@anker.com](mailto:support@anker.com) (a complete list of all contact methods available can be found on the Anker SOLIX website's Contact Us page) with the following information: (i) a short description of the defect, (ii) the product's serial number, and (iii) a scanned copy of the purchase receipt or warranty certificate of the applicable product.

Upon the buyer's notification, Anker SOLIX shall provide problem analysis and troubleshooting when possible and, if troubleshooting did not resolve the issue or is unavailable under the limited warranty, continue with verification of the warranty. The product's serial number must be legible and properly attached to the product in order to be eligible for warranty coverage. If Anker SOLIX determines that the reported defect is not eligible for coverage under the limited warranty, Anker SOLIX will notify the buyer accordingly and will explain the reason why such coverage is not available. If Anker SOLIX determines that the reported defect is eligible for coverage under the limited warranty, Anker SOLIX will notify the buyer accordingly, and Anker SOLIX may, in its sole discretion, take any of the following actions:

Provide the buyer with replacement parts or replacement units for the product; Anker SOLIX will not elect to issue a refund unless (1) Anker SOLIX is unable to provide a replacement and repair is not commercially practicable or cannot be timely made, or (2) the buyer is willing to accept such a refund. In the event of a defect, to the extent permitted by law, these are the buyer's sole and exclusive remedies.

Anker SOLIX will determine whether the product should be returned to Anker SOLIX and, if Anker SOLIX so determined, the Return Merchandise Authorization ("RMA") Procedure will be invoked. Anker SOLIX reserves the right to make the decision on whether to use new or refurbished parts for warranty repairs. These parts, whether new or refurbished, will be at least functionally equivalent to the original part in question. The original Spare part model, if no longer available, may be replaced with a similar Spare part model. The replacement Spare part provided by Anker SOLIX will be functionally equivalent to the customer's defective product in terms of features, functions, and compatibility. The software version shall be by default. In no event shall Anker SOLIX refund the Customer in cash or in kind if the Customer rejects to accept replacement with a similar spare part model. The warranty period of the replacement product shall follow the remainder of the original product warranty period.

Where the RMA Procedure is invoked by Anker SOLIX, Anker SOLIX will instruct the buyer how to package and ship the product or part(s) to the designated location and will deliver the repaired or replaced product or part(s) to the buyer in the buyer's original country. If the defective product or part is not received by Anker SOLIX within 60 days of issuance of the RMA, Anker SOLIX will invoice the customer, and the customer will pay, the then-current list price for such new product or part. The returned defective product must not have been disassembled or modified without the prior written authorization of Anker.
